Summary

- Reliable Java Developer with diverse experience in web game design, commercial driving, technical support, and nursing.
- Strong organizational skills and problem-solving ability.
- Eager to contribute to software development projects.

Personal Projects

CRUD Demo

- Live demo for managing entries in an H2 database.
- Developed with Java, Spring Boot, jQuery, and H2 using MVC pattern.

Back-End Development

- Spring Boot backend for CRUD operations and server stats retrieval.
- Crafted RESTful APIs, integrated services with Spring Annotations, and set up CORS for https://deanofwalls.github.io.

Front-End Development

- Hosted on Github Pages with HTML, CSS, and AJAX for dynamic data operations.
- Incorporated CORS for secure front-to-back-end communication.
